

BBT

Automotive Components GmbH
German Technology

BBT Automotive Components GmbH

German **quality** by tradition

German technology, inspiration, innovation and customer orientation – that is what our **family-owned, traditional business** stands for. As one of the **leading manufacturers of ignition coils and ignition cables** and supplier of an **extensive range of sensors**, we have been an important part of the international automotive after-market **since 1992**.

Our **international presence** has been expanding for decades following participation in fairs in Asia, North America and Europe. With the highest quality standards, passion and loyalty, we satisfy our customers worldwide every day.

BBT-service

authentic
professional **flexible**

Strong trading links are based on trust and responsibility!

The highest level of customer service is not just an empty phrase for us, it is of the utmost importance.

Our capable employees are in close dialogue with the customers and partners in order to be able to take individual requirements into quickly consideration.

With a 70% export share, our high-quality products, expertise and excellent service are appreciated by **well-known customers worldwide**.

Due to efficient planning methods, **we achieve availability of more than 95%** and fast delivery times.

We also emphasize on **careful inspection of goods, checks on every stage of the production line** and on a **reliable network of suppliers**. Therefore, we can offer consistent quality of BBT products, in addition to stable manufacturing and delivery processes.

Product portfolio

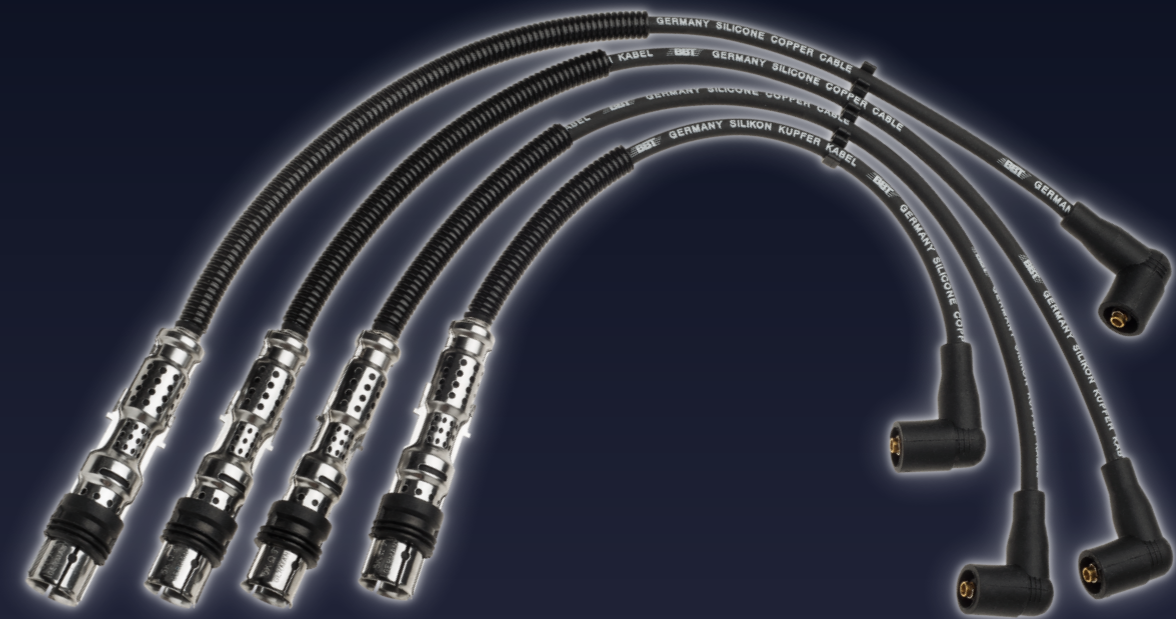

- Ignition coils
- Ignition cable sets
- Crankshaft and camshaft sensors
- Wheel speed sensors (ABS-Sensors)
- Mass airflow sensors
- Map-Sensors
- Exhaust gas temperature sensors
- Fuel pumps/Fuel supply units
- Tyre pressure sensors
- EGR valves
- Lambda sensors

Product innovation timeliness with future

The **consideration of current trends and developments** enables us to act in a quick and flexible way and to present product innovations.

Vehicle manufacturers' current models are a priority in this respect. In addition to **our in-house production program**, our product range also includes **OEM** and qualified **AM** parts. All of these BBT products are subject to strict criteria and quality controls. We are forming the future with passion and quality workmanship.

That's why we develop our own mass airflow sensors and numerous sensors, which can also guarantee consistently high quality in the future due to customised testing facilities and innovative processes.

Ignition cables made in Germany

BBT ignition cables have already been satisfying international customers with **high standards and fitting precision** for German, European and Asian vehicles **since 1992**.

The ignition cable sets built to OEM specs, are manufactured in large and small series – heat-resistant, durable and tested. Made in Germany.

Ignition coils made in Germany

Finding high-quality alternatives in the automotive aftermarket, in addition to OEM ignition coils, is turning out to be a high target.

That's why BBT has been developing **durable, reliable and efficient ignition coils in accordance with OE specifications since 2009**.

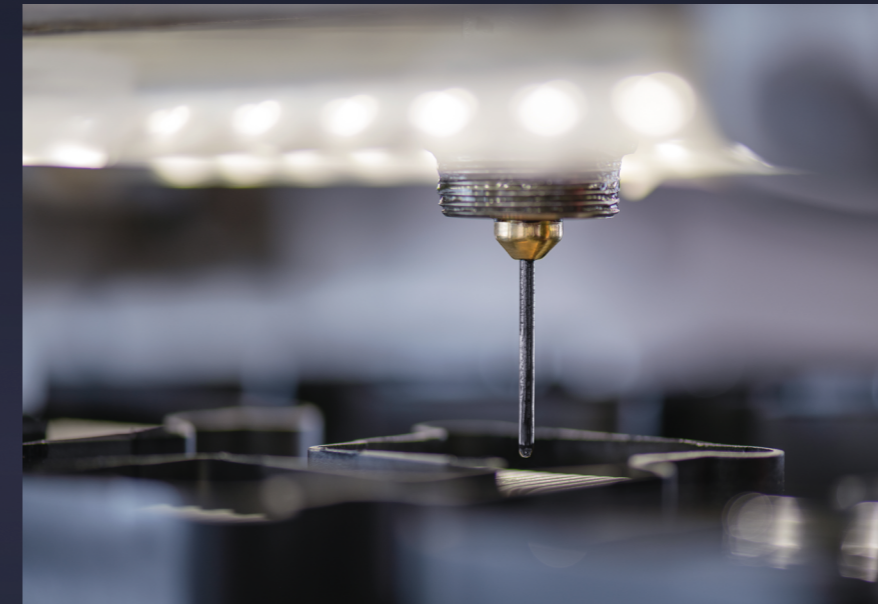

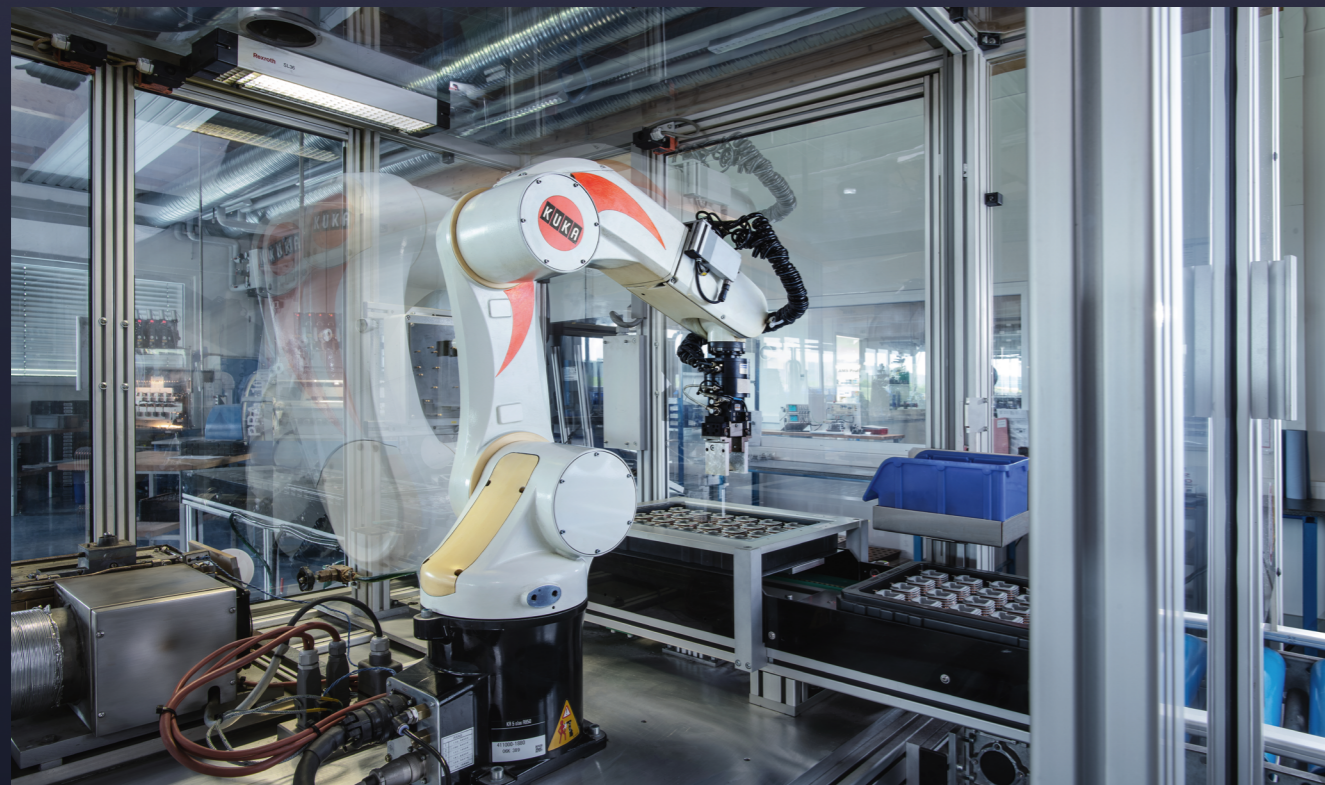

By tradition and Credo

We develop, produce and market ignition coils, ignition cable sets and sensors for combustion engines **by conviction**. Themed: “with tradition and innovation”, our employees use teamwork to generate **ground-breaking solutions and products**. Well-known European machinery manufacturers are essential, due to the product complexity.

We rely on a **high degree of production depth** to achieve maximum product quality.

Our **careful testing techniques and processes** are constantly adapted to new technologies. When selecting raw materials for production, we rely exclusively on high-quality components, as quality assurance is regarded as a real competitive advantage at BBT.

Responsibility and solidarity sustainability

Sustainability is important to us. This is why we work in accordance with the ISO 14001 **Environmental Management Standard**, in addition to manufacturing durable spare parts.

We not only accept responsibility for the environment, but also for our employees.

With an **Occupational Health & Safety Management System (ISO 45001)** and the **inclusion and support of people with disabilities**, we also support the productive cooperation and further development of our employees.
